Asi Krinitz Full Stack Developer

AsiKrinitz@gmail.com 052-7458800 Haifa, Kiryat Haim
1996 GItHub Linkedin AsiWebsite

Professional Summary

- Full Stack Developer with 3+ years of experience building and maintaining SaaS platforms and production web applications using Angular (v5–18), ASP.NET MVC, REST APIs, SQL Server, and GitHub for version control.
- Strong in end-to-end feature ownership — from frontend UI/UX and backend business logic to database design, performance optimization, and third-party integrations (payments, OTP/SMS, email systems).
- Known for clean, maintainable code, fast learning, and improving stability, performance, and user experience in real production systems.

Tech Stack

Frontend: **Angular** (v5–18), **React**, HTML, CSS.
Backend: **ASP.NET** MVC, **Node.js** (Express), **NestJS** – REST APIs.
Databases: **SQL** Server, **MongoDB**.
Programming Languages: TypeScript & JavaScript (ES6+), C#.
Tools & DevOps: Git, GitHub, IIS (deployment), Postman (API testing), NVM, RDC.

Programming Languages – Knowledge & Academic Background

- **Java** – Strong academic foundation (3 years) including OOP, core language concepts, data structures, and exam-level implementations.
- **Python** – Academic background with hands-on teaching experience.
solid understanding of core syntax, control flow, functions, and basic OOP.

Professional Experience

Go-Net 01/2023 – Present
Full Stack Developer

- Developed and maintained production **Angular** applications (v5–18) used by a large enterprise client.
- Developed and maintained REST APIs and controllers in **ASP.NET** MVC, handling business logic, authentication, and external integrations.
- Designed and optimized **SQL Server** databases, including stored procedures and query performance tuning.
- Integrated third-party services such as payment systems, OTP, SMS, and automated email notifications.
- Implemented Tranzila payment integrations (credit card, Bit app, token-based payments, installment plans, refunds) and handled related production flows and errors.
- Integrated Histadrut APIs for real-time member data processing and automated validation across test and production environments.
- Implemented reliable server-side file upload and download.
- Refactored legacy code and improved UI/UX, reducing bugs and improving system stability.
- Deployed and maintained production systems via **IIS**,
supported releases and version management (backups).

Projects

JobFinder – Full-stack job platform – Final college project
Watch a short video where I explain my project on my **website.**

Tech Stack:
Frontend: **Angular**
Backend: **Node.js** (Express)
Database: **MongoDB**
Auth & Security: Auth0 (Authentication & Authorization)
Version Control: Git, GitHub

- Developed a full-stack web platform for job seekers and employers, including end-to-end flows for job posting, search, and applications.
- Implemented authentication and authorization with Auth0, including secure login, role-based access, and protected routes in both Angular and Node.js APIs.
- Built RESTful APIs in Node.js (Express) and a responsive Angular UI with routing, forms, and validation.
- Used Git and GitHub for source control, maintaining separate repositories for the Angular frontend and Node.js backend, with frequent commits for new features, fixes, and versions.
- Purchased domain & rented a server - Managed server via Remote Desktop (RDC) - Deployed using IIS

GitHub: **WorkFind** | **WorkFindServer**

Personal Portfolio Website

Tech Stack:
React (Vite), NestJS, REST APIs, Axios, JavaScript (ES6+), HTML, CSS

• Developed a personal portfolio application using React with integrated backend communication via NestJS APIs.
• Implemented REST API interaction using Axios (GET, POST), enabling dynamic client-server data flow.
• Integrated a dedicated project page for JobFinder, including an embedded YouTube explanation video.
• Focused on clean UI, responsive layout, and clear presentation of technical experience.
• Deployed the project publicly and maintained it via GitHub.

Education & Certificates

Diploma in Software Engineer 2021 – 2023
Ort Kiryat Bialik college
- Graduated with honors.
- Selected for an excellence program for top students.

Certified Computer Technician 05/2025 – 11/2025
Collage Of Management Haifa
- Certified Computer Technician.
- MCDST – Microsoft Certified Desktop Support Technician.

Military Service

Air Defense Warrior – IDF 03/2015 – 03/2018
Operated the Patriot air and missile defense system.
