📅 1996 🔄 Angular Project 🌐 LinkedIn 🔗 AsiWebsite

👤 Professional Summary

- Full Stack Developer with 3+ years experience building and maintaining production web apps using Angular (v8–15), ASP.NET MVC, REST APIs, SQL Server and GitHub for version control.
- Strong in end-to-end feature ownership — from frontend UI/UX and backend business logic to database design, performance optimization, and third-party integrations (payments, OTP/SMS, email systems).
- Known for clean, maintainable code, fast learning, and improving stability, performance, and user experience in real production systems.

🔧 Tech Stack

Frontend: **Angular**, **React**, TypeScript, JavaScript (ES6+), HTML, CSS

Backend: **ASP.NET** MVC, REST APIs, **Node.js**

Databases: **SQL** Server, **MongoDB**

Tools & DevOps: Git, GitHub, IIS, RDC, Postman, NVM

🔗 Programming Languages – Knowledge & Academic Background

- **Java** – Strong academic foundation (3 years) including OOP, core language concepts, data structures, and exam-level implementations.
- **Python** – Academic background with hands-on teaching experience; solid understanding of core syntax, control flow, functions, and basic OOP.

📁 Professional Experience

Go-Net

01/2023 – Present

Full Stack Developer

- Developed and maintained production **Angular** applications (v8–15) used by a large enterprise client.
- Built backend REST APIs and controllers in **ASP.NET** MVC, handling business logic, authentication, and external integrations.
- Designed and optimized **SQL Server** databases, including stored procedures and query performance tuning.
- Integrated third-party services such as payment systems, OTP, SMS, and automated email notifications.
- Implemented reliable server-side file upload and download.
- Refactored legacy code and improved UI/UX, reducing bugs and improving system stability.
- Deployed and maintained production systems via **IIS**, supported releases and version management (backups).
- Implemented Tranzila payment integrations (credit card, Bit app, token-based payments, installment plans) and handled related production flows and errors.

Projects

JobFinder – Full-stack job platform – Final college project

Watch a short video where I explain my project on my [website](#). 

Tech Stack:

Frontend: **Angular**

Backend: **Node.js** (Express)

Database: **MongoDB**

Auth & Security: Auth0 (Authentication & Authorization)

Version Control: Git, GitHub

- Developed a full-stack web platform for job seekers and employers, including end-to-end flows for job posting, search, and applications.
- Implemented authentication and authorization with Auth0, including secure login, role-based access, and protected routes in both Angular and Node.js APIs.
- Built RESTful APIs in Node.js (Express) and a responsive Angular UI with routing, forms, and validation.
- Used Git and GitHub for source control, maintaining separate repositories for the Angular frontend and Node.js backend, with frequent commits for new features, fixes, and versions.
- Purchased domain & rented a server - Managed server via Remote Desktop (RDC) - Deployed using IIS

GitHub: [WorkFind](#)  | [WorkFindServer](#) 

Personal Portfolio Website – React

Tech: React, JSX, JavaScript (ES6+), HTML, CSS

- Built a personal portfolio website using React and JSX with a component-based structure.
- Integrated a dedicated project page for JobFinder, including an embedded YouTube explanation video.
- Focused on clean UI, responsive layout, and clear presentation of technical experience.
- Deployed the project publicly and maintained it via GitHub.

Education & Certificates

Diploma in Software Engineer

2021 – 2023

Ort Kiryat Bialik college

- Graduated with honors.
- Selected for an excellence program for top students.

Certified Computer Technician

05/2025 – 11/2025

Collage Of Management Haifa

- Certified Computer Technician.
- MCDST – Microsoft Certified Desktop Support Technician.

★ Military Service

Air Defense Warrior – IDF

03/2015 – 03/2018

Operated the Patriot air and missile defense system.
